

Florida Polygraph Association

Fostering professional and accurate polygraphy throughout the State of Florida

Saturday, November 17, 2018 – Training Schedule

Afternoon Presentation (Follow-up):

Probably one of the most “dry” and “boring” subjects that we as examiners have to endure on a recurring basis are presentations regarding physiology. The principal reason is that the vast majority of presentations address complex physiology with absolutely no reference to what it means on a day-to-day basis for field polygraph examiners.

Recently, the polygraph has once again been thrown into national prominence related to politics at the national level. For example, the polygraph test of Christine Ford, Supreme Court Justice Kavanaugh’s accuser. A polygraph exam, perhaps of greater importance to be released before this seminar, will be used to present physiology in an applied setting, and “WHY” for us as examiners need this knowledge. Bring your questions!!

October 30, 2018, ABC news made public the fact that Roger Stone, a close friend of President Trump was administered two sets of polygraph examinations in relation to allegations that appear to be of interest to the Mueller Investigation and Russian interference in the 2016 elections:

As special counsel closes in, Roger Stone suits up for legal battle

https://abcnews.go.com/Politics/special-counsel-closes-roger-stone-suits-legal-battle/story?id=58849731&cid=share_facebook_widget&fbclid=IwAR100cDkGWNHCJ5BHGpjQ2_gddh vKKmjIVZTjDGOLMSu7awh4Gkt-tJ3mQg

Those exams will be the basis for discussing the applied physiology, theory, and related science in assessing credibility.
